Change in accounting policies (IFRIC 12).

Deutsche Telekom has adopted a change to the accounting policies for service concessions under IAS 8 effective June 30, 2008. They are now accounted for in accordance with the regulations in the interpretation IFRIC 12 "Service Concession Rights." Service concessions are arrangements whereby a government or other public sector entity as the grantor grants contracts for the supply of public services to private sector entities as operators. Depending on the consideration the operator receives from the grantor, the operator recognizes a financial or an intangible asset. A financial asset is recognized if the operator has an unconditional contractual right to receive cash or another financial asset from the grantor. If, however, the consideration the operator receives from the grantor is a right to impose charges upon users, which does not represent an absolute right to receive payments, an intangible asset is recognized. Depending on the contractual arrangements, recognition of both a financial asset and an intangible asset is possible as well. For Deutsche Telekom's consolidated financial statements, this change in accounting policies is relevant to the operations of the Toll Collect group. Toll Collect is an associate accounted for using the equity method. This change in accounting policies is applied retrospectively. The prior-year comparatives have been adjusted accordingly. This change in accounting policies has no material effect on the presentation of the results of operations and financial position of the Group.
